

You'll need:

Scissors & glue stick.

Instructions

Back the large pieces onto card.

Cut round the edges of each piece and the flaps on the bottom of the chariot. The large rectangle at the base of the chariot is a stand; don't fold this. Fold the remaining tabs and glue the base into place.

Fold the horse in half and lightly glue the ends of the head together. Add the reins by gluing to the side of the head.

Glue the chariot wheels onto the side of the chariot and attach the reins onto the outer rim.
