

You'll need:

Scissors.

Instructions

Cut out the large square.

Fold along all the bold and dotted lines.
(Fold in half then into the centre from each side and corner)

Each flat side needs to be folded into the centre. Fold one side then fold back the corner and fold the next side. When all four sides are done it will leave you with what looks like a pinwheel

Open out each corner and flatten it down.

Discover the various combinations as you play with the folds.
