

You'll need:

Scissors,
acetate (clear
plastic), glue.
optional
ribbon or a
headband.

Instructions

Print onto acetate if possible.
Cut out each piece.

Holding the base of each piece pass the shape over a real flame to make the edges warp and curl.

Stick the flame parts together.

Take the long strip from the base of the page and trim off the outside red lines.

Fold along the dotted lines and then add glue to the two end sections. Glue these to each side of the base of your flame.

Thread the clear loop round a ribbon or headband.
